### SPECIFICATIONS

#### **[KV-M2150U/M2151U/M2150L/M2151L]**

Television system I  
Color system PAL  
Channel coverage UHF: 21-69 (KV-M2150U/M2151U)  
VHF: A-J UHF: 21-69  
(KV-M2150L/M2151L)  
Picture tube Black Trinitron tube  
90° degree deflection  
Approx. 54.5 cm (21 inches)  
(Approx. 51.0 cm picture measured diagonally)  
Inputs 21-pin connector: CENELEC standard  
Including RGB input  
VCA Audio/Video input jacks: phono jacks  
S-Video input  
Outputs 21-pin connector: CENELEC standard  
Headphones jack: minijack  
Sound output 6 W (Music)

Power consumption 96W (KV-M2150U)  
99W (KV-M2151U)  
70.5Wh (KV-M2150L)  
73.5Wh (KV-M2151L)  
Dimensions Approx. 513x477x478 mm (w/h/d)  
Weight Approx. 24 kg

#### **[RM-826]**

Remote control system infrared control  
Power requirements 3V dc  
2 batteries IEC designation  
R6 (size AA)  
Dimensions Approx. 75x221x23mm (w/h/d)  
Weight Approx. 230g including batteries  
Accessories supplied IEC designation R6 batteries (2)  
Supplied accessories RM-826 Remote Commander (1)  
IEC designation R6 batteries (2)

**Warning**

The flexible mains lead is supplied connected to a B.S. 1363 fused plug having a fuse of 5 amp capacity. Should the fuse need to be replaced, use a 5 AMP FUSE approved by ASTA to BS1362, ie carries the ⚡ mark.

IF THE PLUG SUPPLIED WITH THIS APPLIANCE IS NOT SUITABLE FOR YOUR SOCKET OUTLETS IN YOUR HOME, IT SHOULD BE CUT OFF AND AN APPROPRIATE PLUG FITTED. THE PLUG SEVERED FROM THE MAINS LEAD MUST BE DESTROYED AS A PLUG WITH BARED WIRES IS DANGEROUS IF ENGAGED IN A LIVE SOCKET OUTLET. When an alternative type of plug is used it should be fitted with a 5 AMP FUSE, otherwise the circuit should be protected by a 5 AMP FUSE at the distribution board.

**How to replace the fuse**

Open the fuse compartment with the blade screwdriver, and replace the fuse.

**CAUTION**

SHORT CIRCUIT THE ANODE OF THE PICTURE TUBE AND THE ANODE CAP TO THE METAL CHASSIS, CRT SHIELD, OR CARBON PAINTED ON THE CRT, AFTER REMOVING THE ANODE.

**SAFETY-RELATED COMPONENT WARNING!!**

COMPONENTS IDENTIFIED BY SHADING AND MARK ⚠ ON THE SCHEMATIC DIAGRAMS, EXPLODED VIEWS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

# SECTION 1 GENERAL

## 1-1. PRESETTING OF CHANNELS

Before viewing the TV programmes your need to preset TV channels. There are 60 spaces available for storing these channels. TV stations broadcast their channels at certain frequencies. You must preset these channels to programme numbers on the TV. Slide open the full-function side of the Remote Commander to reveal preset buttons.

Automatic presetting of channels	
Action	Result
<b>1</b> Turn on the TV using the power switch  on the set.	
<b>2</b> Press the  button.	You are now in the preset mode. The programme number flashes.
<b>3</b> Press either the number buttons or PROGR +/- to select the programme number on which you want to preset the channel. 	The selected programme number will be indicated.
<b>Note:</b> in the case of two digit numbers, first press +/-, then the two numbers.	
<b>4</b> Press the  + or - button repeatedly, until the desired channel is tuned in. 	The scale with the frequency band changes.
<b>5</b> Repeat steps 3 and 4 for all other channels.	
<b>6</b> Press the  button to store the channels.	All channels are now stored. The programme number stops flashing.

### How to skip programmes

Since you have 60 programmes at your disposal, you may want to skip vacant programme positions. This means that they are skipped when you press the PROGR +/- buttons.

Action	Result
<b>1</b> Press the  button.	You are now in preset mode, the programme position flashes.
<b>2</b> Use PROGR + or - to select the programme position you want to skip. 	The selected programme position appears.
<b>3</b> Press C00. 	
<b>4</b> Repeat steps 2 and 3 to skip other programmes.	
<b>5</b> Press the  button.	The programme position is now skipped. You are back in TV mode.

### How to fine tune a channel manually

If the reception of a stored channel is not satisfactory, you can fine tune the channel manually.

Action	Result
Press the  + or - button until the reception is good. 	The channel is now fine tuned.

**Note:** By pressing the respective programme number the automatic fine tuning will be restored.

## 1-2. BASIC TV OPERATION

This section introduces you to the basic control functions which are available on the TV set and on the simple side of the Remote Commander.

How to turn the TV on and off	
Action	Result
<b>Turning on</b> Press the power switch  on the set.	The TV will turn on. Note: If the screen remains blank, the TV may be in standby mode. In this case, press  .
<b>Turning off</b> <b>A Temporarily</b> Press  .	The TV is now in standby mode. Press  or any number button to return to TV mode.
<b>B Completely</b> Press the power switch  .	The TV will turn off.

### How to select programmes

Before selecting programmes make sure that you have preset channels.

Action	Result
Press PROG +/- or the respective number button. Note: In the case of two digit numbers first press +/- and then the two number buttons.	The selected programme is displayed.

**On the set:**  
Press the + or - button for programme selection.

### How to adjust the volume

Action	Result
Press  + or -.	The volume markers will appear and the volume is adjusted accordingly.

**On the set:**  
Press  until the  symbol is displayed, then adjust with the +/- buttons.

### How to use additional functions

**Viewing of Teletext:** (only for KV-M2151U/KV-M2151L)

Press . To return to TV mode, press .

**Viewing of the video input:**

Press . To return to TV mode, press .

## 1-3. ADVANCED TV OPERATION

This section introduces you to the advanced control functions which are available on the full function side of the Remote Commander

### How to adjust the picture

Although the picture has been adjusted at the factory, you might want to adjust it to your own taste. For modifications please follow the steps:

Action	Result
<b>1</b> Press button  repeatedly, until the desired item is displayed. Note:  contrast,  colour intensity,  brightness.	The symbol and the level indicator for the selected item is displayed.
<b>2</b> Press button + or -  .	The picture item is adjusted.

**On the set:**  
Press button  repeatedly in order to select the desired item, then adjust with button + or -.

**To return to factory set levels:**  
Press the  button.

### How to use the Sleep Timer

You can select a time after which the set goes automatically into standby mode. Press button  repeatedly until the desired time is displayed on the screen (30, 60, 90 minutes or 0 for cancelling the request).

### Other functions

How to	Action	The resume normal picture/sound
Display the programme number.	Press  .	Press  again.
Mute the sound.	Press  .	Press  again.
Request the time (only if teletext is available).	Press  .	Press  again.

## 1-4. TELETEXT OPERATION (KV-M2151U/M2151L ONLY)

TV stations broadcast teletext programmes via the TV channels. To receive teletext programmes, use the buttons indicated in green on the full function side of the basic Remote Commander. With the simple side of the Remote Commander only the basic operation is possible.

How to view the teletext	
Action	Result
<b>1</b> Select the channel which carries the teletext service you wish to view.	The channel changes on the screen.
<b>2</b> Press  . The teletext service appears, if the teletext signal is not broadcast <b>P100</b> is displayed.	
<b>3</b> Input three digits for the page number using the number buttons. <b>Note</b> If you make a mistake, type in any three digits, then re-enter the correct page number.	The numbers are entered on the screen. The requested page will appear in a few seconds.
<b>To return to the TV mode:</b> Press . <b>To change the teletext channels:</b> First press  to return to TV mode, then repeat steps 1 to 3.	

**Note**  
If the signal of the TV channel is weak, teletext errors may often occur.  
The has no function on this set.

How to use the Advanced Features of Teletext	
How	Action
Request the index page.	Press  (INDEX)
Access the next or preceding page.	Press  (PAGE +) or  (PAGE -).
	Result (on-screen display)
	The index page appears. 
	The next or preceding page appears. 

How to	Action	Result
Superimpose the teletext display on the TV programme	Press  once if you are in text mode or press  twice if in TV mode To return to the normal teletext display press  again.	The teletext displays are superimposed on the TV programmes. 
Prevent a teletext page from being updated or changed.	Press  (HOLD) To resume normal teletext reception, press  (TEXT/MIX).	The HOLD symbol  appears on the screen and the chosen sub-page is held until you cancel. 
Enlarge the teletext display.	Press  once to enlarge the upper half. Press twice to enlarge the lower half. Press again to restore the normal display.	The upper half is enlarged. 
Revealed concealed information (e.g. answers to a quiz).	Press  (REVEAL). Press again to conceal the information.	The information is revealed. 
Watch the TV programme while waiting for a requested page to be displayed.	1. Request the new page. 2. Press  (TEXT CL).	The numbers are entered. The TV programme is displayed and the requested page number and other teletext data appear at the top of the screen.
	3. When the requested page has been captured, the page number remains and the other data disappears. 4. Press  to view this page.	 The requested page is displayed.

Some of the features may not be available depending on the Teletext service.

How to use the FASTEXT feature	
FASTEXT feature allows you to access pages quickly with one key operation. When a FASTEXT page is broadcast, a colour coded menu appears at the bottom of the screen. Each coloured prompt corresponds to the coloured buttons on either side of your Remote Commander.	
Operation	
Action	Result
Press on the coloured buttons which corresponds to the coloured prompt on the teletext.	The selected teletext page appears.

**Note**  
Correct FASTEXT operation depends on the necessary signals sent from the TV station.

## 1-5. OPTIONAL CONNECTIONS/OPERATIONS

### How to connect additional Audio/video equipment

### How to view the Video input signal

Press button in order to select the desired input mode ( for Audio/video signals from 21-pin EURO connector or from the video/audio connectors V ( A on the front; for S-video signals from the S-video (4-pin DIN) connectors on the front). Press button to return to TV mode.

**On the set:**  
Press button once, the symbols , , will appear on the screen, then press the + button to select the desired video input mode. Press and + buttons again to return to TV-mode.

### S-video input (Y/C input)

Video signals may be separated into Y (luminance or brightness) and C (chrominance) signals. Separating the Y and C signals prevents them from interfering with one another, and therefore improves picture quality, especially luminance. This TV is equipped with one S-video input jack through which these separated signals can be input directly.

### Notes

- When you have Audio/video equipment connected to both the A/V connectors and the 21-pin terminal, make sure that both are not switched on at the same time, otherwise the picture could be incomplete.
- In case of sound and picture distortions move the VTR away from the TV set.

## 1-6. ADDITIONAL REMOTE COMMANDER OPERATION

### How to Control Other Sony Video Equipment

By switching the VIDEO 1/2/3, MDP selector, you can operate most Sony video equipment (Beta VTR, 8mm VTR, VHS VTR, and video disc player).

**1** Set VIDEO 1/2/3, MDP selector according to the desired video equipment.

VIDEO 1: Beta or ED Beta VTR  
VIDEO 2: 8mm VTR  
VIDEO 3: VHS VTR  
MDP: Video disc player

VIDEO 1-2-3 MDP

**2** Use the buttons in the indicated area to operate video equipment.

**Note**  
When you use button, be sure to press this button and the one on the right simultaneously.

### Notes

- If your video equipment is furnished with COMMAND MODE selector, set the selector to the same position as the VIDEO 1/2/3, MDP selector on the supplied Remote Commander.
- If the equipment does not have a certain function, the corresponding button on the Remote Commander will not work.

Buttons to operate other Sony Video equipment

# 1-7. ADDITIONAL INFORMATION

## Parts Identification

**A**

**B**

**C**

**D**

This section briefly describes the buttons and controls on the TV set and on the Remote Commander. For more information,

A TV set – Front	
Sign	Name
	Main power switch
	Standby indicator
	Input jacks (Video/Audio/S-Video)
	Function selector (Programme/volume/input)
	Adjustment buttons for function selector

B TV set – Rear	
Sign	Name
	Headphones jack
	21-pin Euro-AV connector (RGB/video input, TV output)
	Aerial terminal (IEC type)

C Remote Commander – simple side	
Sign	Name
	Input mode selector
	Teletext button
	Fastext buttons
	TV mode selector
	Standby button
	Number buttons
	Double-digit entering button
	Volume control buttons
	Programme selector

D Remote Commander – full function side	
Sign	Name
	Mute on/off button
	Standby button
	Number buttons
	Input mode selector
	TV power on/TV mode selector button
	Teletext button
	Double-digit entering button
	Request time display
	Teletext operation buttons
	Fastext buttons
	On-screen display button
	Sleep timer
	Picture adjustment reset button
	Volume control
	Programme selector
	Picture controls
	Video equipment selector
	Video equipment operation buttons
	Programme number clear button
	Channel preset/store button
	Tuning buttons

### Troubleshooting

Here are some simple solutions to the problems which may affect the picture and sound.

Problem	Checking and solution
No picture (screen not lit), no sound	<ul style="list-style-type: none"> <li>• Connect the set to a working outlet.</li> <li>• Press the power switch .</li> <li>• If the standby indicator shines red, press the TV button on the Commander C.</li> <li>• Check the aerial connection.</li> </ul>
Poor or no picture (screen not lit), but sound good	<ul style="list-style-type: none"> <li>• Adjust ,  and  by pressing the + or - button (after selecting with the  button).</li> </ul>
Good picture but no sound	<ul style="list-style-type: none"> <li>• Press .</li> <li>• If  is displayed on the screen, press  on the Remote Commander.</li> </ul>
No colour for colour programmes	<ul style="list-style-type: none"> <li>• Adjust  with the + button after selecting with the  button.</li> <li>• Press  +.</li> </ul>
Snow and noise	<ul style="list-style-type: none"> <li>• Check the aerial connections.</li> </ul>

## SECTION 2 DISASSEMBLY

### 2-1. REAR COVER REMOVAL

### 2-2. SERVICE POSITION

### 2-3. V BOARD REMOVAL (KV-M2151U /M2151L only)

## 2-4. PICTURE TUBE REMOVAL

### • REMOVAL OF ANODE-CAP

NOTE : Short circuit the anode of the picture tube and the anode cap to the metal chassis, CRT shield or carbon painted on the CRT, after removing the anode.

### • REMOVING PROCEDURES

### • HOW TO HANDLE AN ANODE-CAP

- ① Don't hurt the surface of anode-caps with sharp shaped material!
- ② Don't press the rubber hardly not to hurt inside of anode-caps!  
A material fitting called as shatter-hook terminal is built in the rubber.
- ③ Don't turn the foot of rubber over hardly!  
The shatter-hook terminal will stick out or hurt the rubber.

## SECTION 3

### SET-UP ADJUSTMENTS

- The following adjustments should be made when a complete realignment is required or a new picture tube is installed.
- These adjustments should be performed with rated power supply voltage unless otherwise noted. The controls and switch below should be set as follows unless otherwise noted :

● CONTRAST control..... 80%(or Normal by commander)

⚙ BRIGHTNESS control..... 50%

Perform the adjustments in order as follows:

#### Preparation:

- Set the side of the unit with the PICTURE TUBE so that it faces east or west in order to reduce the influence of external magnetic force.
- Turn the power switch for the unit ON and erase the magnetic force using a degausser..

#### 3-1. BEAM LANDING

Demagnetize with a degausser

1. Input a raster signal with the pattern generator.
 

CONTRAST	}	normal
BRIGHTNESS		
2. Turn the raster signal of the pattern generator to red.
3. Move the deflection yoke backward, and adjust with the purity control so that red is in the center and blue and green are at the sides evenly. (Fig.3-1 - 3-3)
4. Move the deflection yoke forward, and adjust so that the entire screen becomes red. (Fig.3-1)
5. Switch over the raster signal to blue and green confirm the condition.
6. When the position of the deflection yoke is determined, tighten it with a deflection yoke mounting screw.
7. When landing at the corner is not right, adjust by using the disk magnets. (Fig.3-4)

Fig.3-1

1. Beam Landing
2. Convergence
3. Focus
4. Screen (G 2) and White Balance

**Note:** Test Equipment Required.

1. Color bar/Pattern Generator
2. Degausser
3. DC Power Supply
4. Digital multimeter
5. Oscilloscope

Fig.3-2

Fig.3-3

Fig.3-4

### 3-2. CONVERGENCE

#### Preparation:

- Before starting, perform FOCUS, H.SIZE, and V. SIZE adjustments.
- Set BRIGHTNESS control to minimum.
- Feed in the dot pattern.

#### (1) Horizontal and Vertical Static Convergence

1. Adjust H.STAT VR to converge red, green and blue dots the in center of the screen.(Horizontal movement)
  2. Adjust V. STAT magnet to converge red, green and blue dots in the center of the screen. (Vertical movement)
  3. If the red, green and blue dots do not converge on the center of screen with H.STAT VR, perform horizontal convergence adjustment using H.STAT VR and V.STAT magnet as shown below. (In this case, H.STAT VR and V.STAT magnet effect each other.)
- Tilt the V.STAT magnet and adjust static convergence to open or close the V.STAT magnet.

4. When the V.STAT magnet is moved in the direction of arrow ㉓ and ㉔, red, green and blue dots move as shown below.

If the red and blue dot do not converge with green dots, perform following steps.

Move BMC magnet (a) to correct insufficient H.static convergence.

Rotate BMC magnet (b) to correct insufficient V.static convergence.

In either case, repeat Beam Landing Adjustment.

## (2) Dynamic Convergence Adjustment

### Preparation:

● Before starting perform Horizontal and Vertical static convergence Adjustment.

1. Slightly loosen deflection yoke screw.
2. Remove deflection yoke spacers.

3. Move the deflection yoke for best convergence as shown below.

4. Tighten the deflection yoke screw.

5. Install the deflection yoke spacers.

## (3) Screen-corner Convergence

### 3-3. FOCUS

Adjust FOCUS so that the whole screen is in best focus.

#### White Balance Adjustment

1. Input all-white signal from the pattern generator.
2. Adjust the BRIGHTNESS and COLOR controls to the standard level.
3. Adjust the following using RV 704 (B DRIVE) and RV 703 (G DRIVE)

In the following adjustments, the CONTRAST, COLOR and BRIGHTNESS controls are set to normal unless otherwise specified.

### 3-4. SCREEN (G 2) and WHITE BALANCE

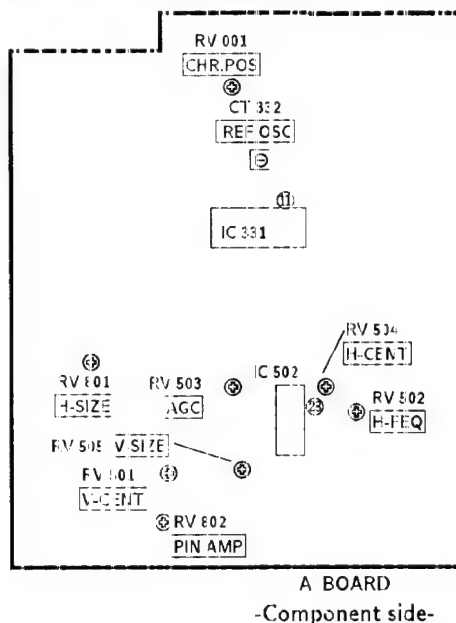

#### Screen (G 2) Setting

1. Input dot signal from the pattern generator.
2. Set the picture BRIGHTNESS control to minimum level.
3. Apply 170 V DC to the cathodes of R,G and B from an external power source.
4. While watching the picture, adjust the G2 control RV701 (SCREEN) immediately before fly-back line disappears.

## SECTION 4

## CIRCUIT ADJUSTMENTS

## 4-1. A BOARD ADJUSTMENTS

**TU AGC Adjustment (RV 503)**

1. Tune in air signal.
2. Adjust AGC VR (RV 503) so that snow-noise and cross-modulation just disappear from the picture.

**RV 504 H.CENT (HORIZONTAL CENTER)****RV 801 H.SIZE (HORIZONTAL SIZE)****RV 501 V.CENT (VERTICAL CENTER)****RV 505 V.SIZE (VERTICAL SIZE)****RV 802 PIN AMP (PINCUSHION AMPLIFIER)****H.FREQ Adjustment (RV 502)**

1. Input a PAL COLOR BAR signal, then connect an electrolytic capacitor (100  $\mu$ /16 V) between pin 28 and GND of IC 502.
2. Adjust RV 502 (H.FREQ) to stop scrolling of the picture in the horizontal direction.
3. After adjustment, remove the electrolytic capacitor.

**REF OSC 8.8 MHz Adjustment (CT 332)**

1. Input a PAL COLOR BAR pattern.
2. Short circuit between pin 11 of IC 331 and ground.
3. Adjust CT 332 to obtain color synchronization.
4. Remove the jumper wire from IC 331.

**CHARACTER POSITION Adjustment (RV 001)**

1. Input PAL COLOR BAR pattern.
2. Adjust RV 001 to position the character display at the point indicated by the arrow below.

#### 4-2. V BOARD ADJUSTMENT (KV-M2151U/M2151L only)

##### RGB LEVEL Adjustment (RV 01)

1. Set PICTURE to maximum.
2. Adjust RV01 till the RGB output becomes maximum.

SECTION 5  
DIAGRAMS

## 5-1. CIRCUIT BOARDS LOCATION

## 5-2. SCHEMATIC DIAGRAMS AND PRINTED WIRING BOARDS

## Note:

- All capacitors are in  $\mu\text{F}$  unless otherwise noted.  $\text{pF}$ :  $\mu\mu\text{F}$   
50 WV or less are not indicated except for electrolytic and tantalums.
- All resistors are in ohms.  
 $\text{k}\Omega = 1000\Omega$ ,  $\text{M}\Omega = 1000\text{K}\Omega$
- Indication of resistance, which does not have one for rating electrical power, is as follows.

Pitch: 5 mm

Rating electrical power  $\frac{1}{4}\text{ W}$ 

- : nonflammable resistor.
- : internal component.
- : panel designation, or adjustment for repair.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- : earth-ground.
- : earth-chassis.
- : no mounted.

**Note:** The components identified by shading and mark are critical for safety. Replace only with part number specified.

## Reference information

RESISTOR	: RN	METAL FILM
	: RC	SOLID
	: FPRD	NONFLAMMABLE CARBON
	: FUSE	NONFLAMMABLE FUSIBLE
	: RS	NONFLAMMABLE METAL OXIDE

5-1. CIRCUIT BOARD LOCATION

Note :

- All capacitors are in  $\mu\text{F}$  unless otherwise noted.  $\text{pF}$ :  $\mu\text{F}$   
50WV or less are not indicated except for electrolytic and tantalums.
- All resistors are in ohms.  
 $\text{k}\Omega = 1000\Omega$ ,  $\text{M}\Omega = 1000\text{k}\Omega$
- Indication of resistance, which does not have one for rating electrical power, is as follows.

Pitch : 5 mm  
Rating electrical power  $\frac{1}{4}$  W

- : nonflammable resistor.
- : internal component.
- : panel designation, or adjustment for repair.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- : earth - ground.
- : earth - chassis.
- : no mounted.

Note : The components identified by shading and marked are critical for safety. Replace only with part number specified.

Reference information

RESISTOR	: RN	METAL FILM
	: RC	SOLID
	: FPRD	NONFLAMMABLE CARBON
	: FUSE	NONFLAMMABLE FUSIBLE
	: RS	NONFLAMMABLE METAL OXIDE
	: RB	NONFLAMMABLE CEMENT
	: RW	NONFLAMMABLE WIREWOUND
	:	ADJUSTABLE RESISTOR
	: LF-8L	MICRO INDUCTOR
	: TA	TANTALUM
COIL	: PS	STYROL
	: PP	POLYPROPYLENE
	: PT	MYLAR
	: MPS	METALIZED POLYESTER
	: MPP	METALIZED POLYPROPYLENE
	: ALB	BIPOLAR
	: ALT	HIGH TEMPERATURE
	: ALR	HIGH RIPPLE
CAPACITOR		

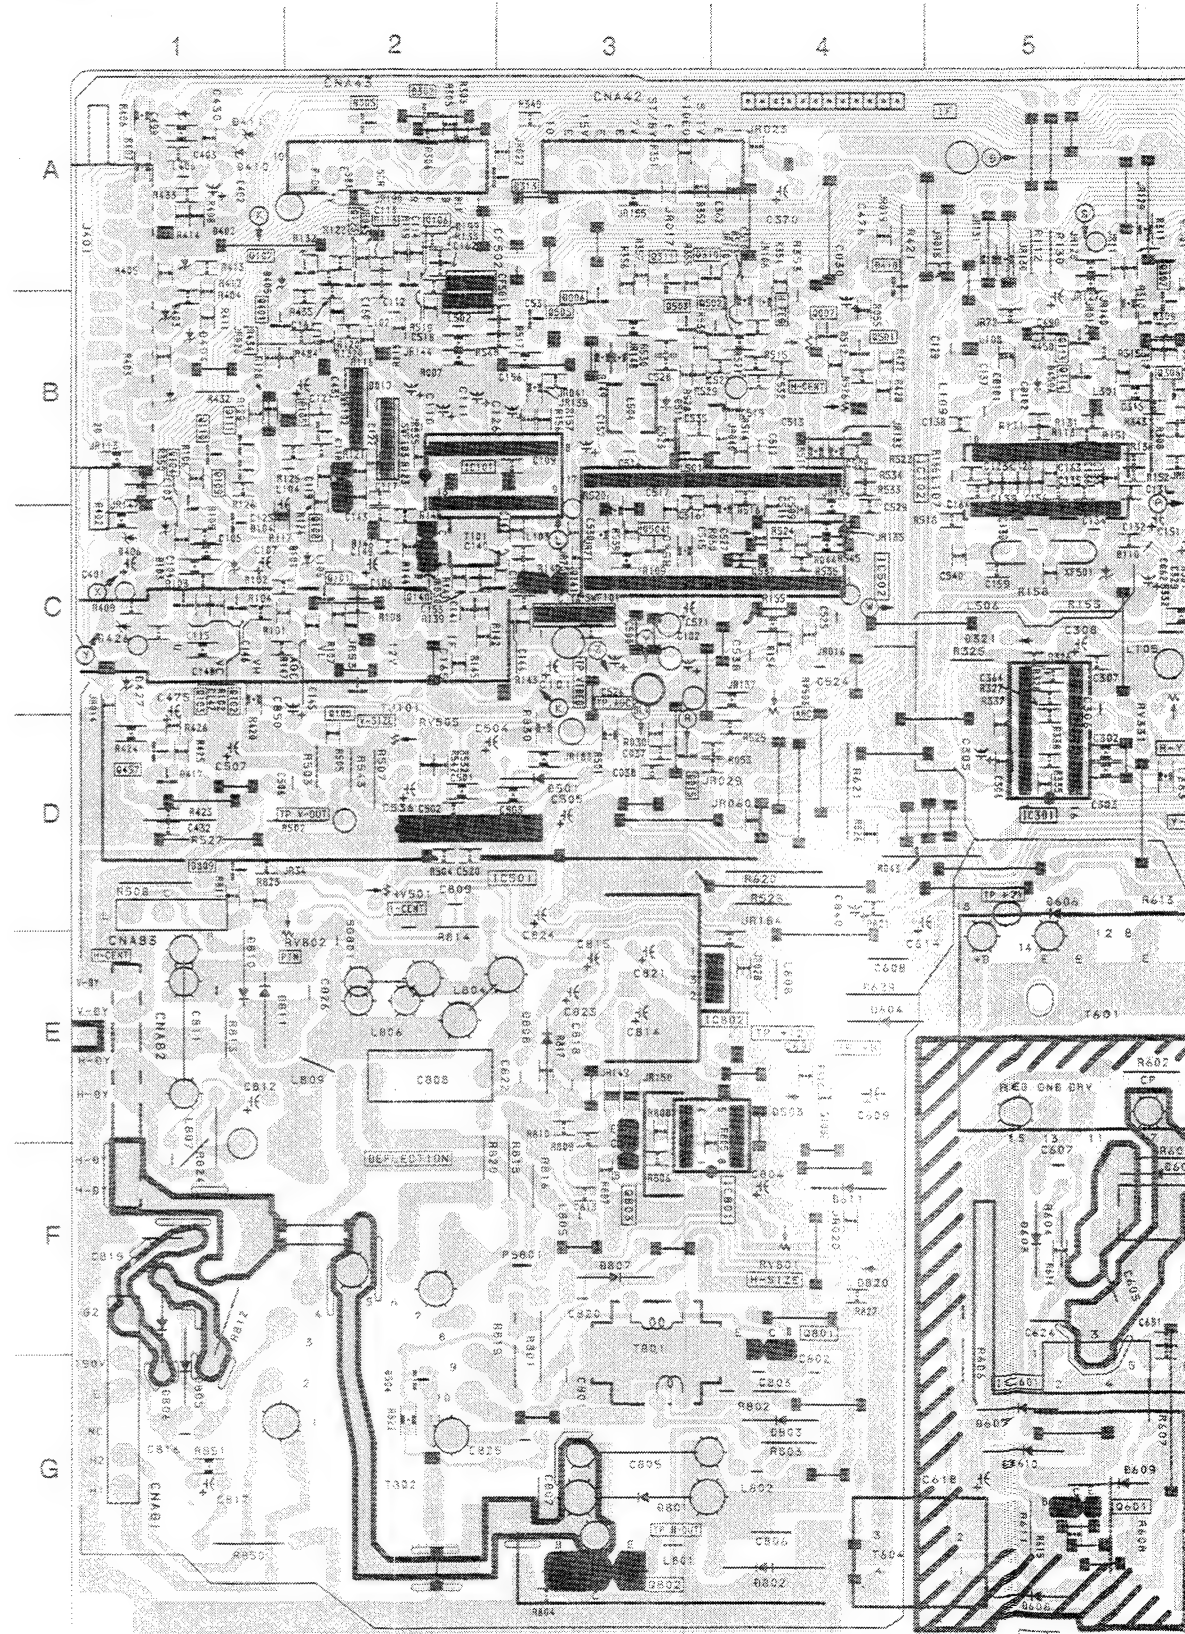

- Readings are taken with a colour-bar signal input
- Readings are taken with 10M $\Omega$  digital multimeter
- Voltages are dc with respect to ground unless otherwise noted.
- Voltage variations may be noted due to normal production tolerances.
- All voltages are in V.
- Circled numbers are waveform references.
- : B+ bus.
- : signal path (RF)

5-2. SCHEMATIC DIAGRAMS AND PRINTED WIRING BOARDS.
